CNT300

Fully automatic immunohistochemistry stainer

3 independent slide trays with 30 slides total capacity
Continuous access to slide trays and reagents during run, can run multiple protocols in parallel.

MircroStacker™

The Dedicated Detection System

The innovative MicroStacker™ technology allows for the orientation-controlled attachment of Fab’ fragments of IgG on the poly-HRP core based on micro-polymer scaf folds.

The proprietary Fab’ labeling methods avoids the occasional blocking of the antibody binding site during the bioconjugation process, thus increase the sensitivity of the polymer.

Biotin-free detection eliminates background staining due to endogenous biotin.

Product Specifications

General characteristics		
Full-automatic	Baking, deparaffinization, antigen retrieval, blocking, detection, counterstain, for IHC, Multiplex IHC and ISH applications.	
Intuitive software interface	Visual monitoring of reagent volume, running time, fault message.	
Waste Separation	Non-toxic deparaffiniation solution. Separate waste containers for hazardous waste (DAB waste) and non-hazardous waste. Help labs save both time and money spent on waste disposal.	
Slide Capacity	3 trays, 30 slides, 10 slides per tray;	
Multifunctional	Support IHC、ISH 、mIHC、ICC、IF protocols	
TurnaroundTime	<4hrs	
Temperature control	100℃	
Dispense volume	100ul,120ul and 150ul	
Reagent container capacity	5mL, 10mL, 25mL, and40 mL	
Number of reagent container spots	36	
Bulk liquid container	2.5L	
Waste containers	15L	
Fluid probe	PTFE coated titanium alloy	
Environmental requirements		
Operating temperature	5℃~ 35℃ (41F ~ 95F)	
Maximum heating energy output	150VA	
Dimensions (L x W x H)	794mm x 770mm x 850mm	
Weight	135KG	
Electrical parameters		
Voltage and Mains frequency	AC 110V/60Hz or AC 220V/50Hz	
Power consumption	1200VA	

MIHC RTU Multiplex IHC kits available

An optimized antibody cocktail technology

Lung adenocarcinoma (CK5/6 Brown, TTF-1 Red)

Normal breast ductal (CK5/6 Brown, p63 Red)

lymphoma (CK3 Brown, PAX5 Red)

PRODUCT FEATURES

Full-automatic

Baking, deparaffinization, antigen retrieval, blocking, detection, counterstain, for IHC, Multiplex IHC and ISH applications.

Reliable

Real-time monitoring and tracking; identify labels by both camera and Infrared to avoid human error.

Multifunctional

Support IHC、ISH、mIHC、ICC、IF protocols

Economical

Dispense volume can be reduced to 100ul to reduce cost.

High Resolution

The innovative MircroStacker™ polymer technology ensures sensitive & specific detection.

Intuitive

Easy-to-use user interface
Visual cues on reagent volume and program status.

Flexible

Ability to continuously load and unload slides during run; Multiple devices can be controlled by a central computer; Customizable staining protocols; Hospital LIS system supported.

Eco - Friendly

Separate waste containers for hazardous waste (DAB waste) and non-hazardous waste. Help labs save both time and money spent on waste disposal.

CNT300

Full-automatic MULTIPLEX IHC Stainer

ICC P16 & Ki67 Dual Stain Kit

Detect two antigens at the same time

P16 & Ki67 / Pap smear

p16 & Ki67 cervical tissue section

Staining Process

ISH in situ hybridization Products

Gold standard for Epstein-Barr virus infection

EBER Gastric Cancer

EBER Lymphoma

Kappa Probe

Lambda Probe
